CodeStates BlockChain (2021.11 ~ 2022.04)

목차

Education

- Future education center CHUNG-ANG UNIVERSITY
    - Computer Engineering BS (2019.02 ~ 2021.02)
    - Credit 4.36 / 4.5

- K-Shield Jr. 6기
    - 보안사고분석대응 과정 (2021.03 ~ 2021. 06)

- codestates beb 02기
    - 블록체인 과정 (2021. 08 ~ 2022. 04)

Training Course

- National Information Society Agency(NIA), Data Creator Camp (2020.09.26)
- AI Yangjae Hub, Embedded deep learning process using JETSON TX2 (2020.09.02 ~ 04)
- Korea Computing Industry Association(K-CIA), Pytorch - Artificial Neural Network Deep Learning Model Development (2020.08.26 ~ 28)
- National IT Promotion Agency(nipa), Utilize AI Technology (2020.07 ~ 08)
- Game User Protection Center(GUCC), Blockchain LV.99 (2020.01.17~23)

Awards

- Jeju MBC Marathon 20th Division 42.195km 1st place
- Jeju TourismMarathon 20th Division 10km 3st place
- Game User Protection Center, Blockchain Manrap Competition
  - Second place. ref

Certificate

- KCCI LICENSE
  - Computer User in the field of Spreadsheet & Database Level - 1
- ICQA LICENSE
  - Network Manager Level 2

Project

1. Automatic Click, CoinPrice
   - [sourceLink](#)

A project using the Python library that automatically finds and clicks the image

Get price coin (medium)

2. Platform (중단)
   - http://wooong-dev.kro.kr

A project that provides various functions and can be enjoyed (currently in production)

3. cls-Color-List-Show
   - [sourceLink](#)

You can divide files and folders with the cls command.

4. Server-agent-system (GUI)
   - [sourceLink](#)

Work created with a graphic interface related to malicious code

5. CoinPrice
   - [sourceLink](#)

> Reduce the inconvenience of having to check the coin price every time

6. DocuFree
   - [sourceLink](#)

> document malware detection

7. wm (wallet maker)
   - [sourceLink](#)

> Command LIne Project, wallet maker with html , rest, just

```
    I am having fun with computer related work.
```
